Overview of Today's Session

- Review of IRS Guidelines on community health needs assessments (CHNA)
- Status of IRS CHNA Guidelines
- Disconnect between IRS Guidelines and Community Benefit Reporting Requirements
- Discussion of key compliance strategies
- Growing interest in collaborative assessments
- Connecting CHNA to community benefit reporting requirements

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

ACA Additions to IRS Tax Code for Tax Exempt Hospitals

- **Sections 501(r)(3)**
 - Community health needs assessments every 3 years
 - Effective for tax years beginning after March 2012
- **Sections 501(r)(4-6)**
 - Financial assistance and emergency care policies; limitations on patient charges; limits on billing and collection practices
 - Effective for tax years beginning after March 2011
- **Must be viewed within the context of changes to Form 990 community benefit reporting requirements (Schedule H)**

Community Health Needs Assessment (CHNA)

- CHNA must:
 - Be conducted not less than every three years
 - Adopt strategy to address needs identified through CHNA
 - Incorporate input from persons representing the broad interests of the community, including those with interest/expertise in public health
 - Be made widely available to the public
- As part of its Form 990 filing, hospital must describe:
 - Its CHNA process
 - How it is meeting identified needs through CHNA
 - Any needs that are not being addressed and why

CHNA Is Part of a Larger Process

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

Flex
Monitoring
Team

University of Minnesota
University of North Carolina at Chapel Hill
University of Southern Maine

Process

- Must describe the process and methods used for CHNA, including identities and qualifications of 3rd party collaborators
- Must identify information gaps that impact ability to assess the health needs of the community served by the hospital facility
- Must identify/assess health needs of community served
- Must incorporate input from persons who represent the broad interests of the community served
- May collaborate with other organizations and use information collected by other organizations (e.g., public health agency)

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

University of North Carolina at Chapel Hill
University of Southern Maine

Oversight and Reporting Requirements

- Secretary of the Treasury shall:
 - Review the community benefit activities of reporting hospitals at least once every 3 years
 - Report to Congress on levels of charity care, bad debt, and unreimbursed costs for services for means- and non-means tested government programs incurred by **all** hospitals; and information on the community benefit activities of private tax-exempt hospitals
 - Report to Congress on trends in the above not later than 5 years after the enactment of the ACA

University of Southern Maine

Penalties for Failure to Comply

- For provisions related to CHNAs, IRS will impose a \$50,000 excise tax for any (and all) taxable year that a hospital fails to comply with these provisions
- Potential challenges to tax exempt status

Reasons for Concern

- CHNA requirements developed within ongoing policy debate about hospital tax exemptions and community benefit
- Community benefit activities are “expected” to address identified community needs
- Hospitals must adopt strategies to address needs identified through CHNA and, as applicable, explain why it has chosen not address needs identified
- Linking CHNAs and community benefit is intended to bring **accountability and transparency** to the process
- IRS to examine community benefits and report to Congress

More Reasons to Worry....

- In today's political/economic environment, nonprofits must be accountable for their tax exemptions
 - *Do No Harm* profiled two whistle blowers who exposed “aggressive” business practices at Phoebe Putney Memorial Hospital in Albany, GA
 - Illinois Supreme Court ruled against reinstating tax exempt status of Provena Covenant for providing insufficient charity care
 - The battle still rages in Illinois: Department of Revenue denied property tax exemptions for three nonprofit hospitals. Gov. Quinn is developing legislation to clarify what is an “adequate level of charity care”
 - New Hampshire Governor raised the possibility of a challenge to LRHHealthcare's tax exempt status following its decision to close 12 primary care practices to current/new Medicaid patients in Nov. 2011

Status of IRS Guidelines

- Notice 2011-52 details provisions that the IRS anticipates will be in proposed regulations
- Can rely on terms of Notice 2011-52 with respect to CHNAs for 6 months following issuance of replacement guidance
- Applies to all 501(c)(3) hospitals
 - Includes government hospitals with dual status even though they do not currently file Form 990
- Current Form 990, Schedule H incorporates ACA changes for financial/billing policies and CHNAs

Key Issues Covered in 2011-52

- Hospital organizations affected – multi-hospital facilities
- CHNA documentation – When/how to conduct CHNA
- Definition of community served
- Community input into process and plan
- Widely available to the public (CHNA is “completed” when written report is made widely available to the public)
- Implementation strategy - how/when to adopt strategy
- Excise taxes
- CHNA reporting requirements
- Effective date

CHNA Reporting Requirements

- A written report must be prepared describing:
 - The community served and how it was determined
 - Process and methods used to conduct CHNA
 - All collaborating organizations (if any)
 - How input on the broad interests of the community served was obtained (who was consulted as well as how and when they were consulted)
 - All needs identified through CHNA, their prioritization, and the process/criteria used in prioritizing identified needs
 - Existing healthcare facilities and other resources in the community available to meet need identified in CHNA (resource inventory)
- Hospitals must respond to Form 990, Schedule H questions on CHNA Process

Defining the Community Served

- Hospital must describe the community it serves and how it was determined. Options:
 - Geographic location (i.e., city, county, or metropolitan region)
 - Target populations served (i.e., children, women, or the aged)
 - Principal functions (i.e., specialty area or targeted disease)
- May not be defined in a manner to exclude:
 - Medically underserved populations, low-income persons, minority groups, or chronic disease needs
- Can use billing/patient records to identify areas where the majority of the hospital's patients come from
- Key is to be reasonable in defining service area

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

**Flex
Monitoring
Team**

University of Minnesota
University of North Carolina at Chapel Hill
University of Southern Maine

Community Input

- Must incorporate input from persons who represent the broad interests of the community served
 - Special knowledge of or expertise in public health
 - Federal, tribal, regional, state, or other local health departments
 - Leaders, representatives or members of medically underserved, low income, minority or chronic disease populations
- May incorporate input from other community representatives
 - Health care consumer advocates, non-profit organizations, community organizations/agencies, academic experts, local government and school officials, health care providers, low-income persons, minority groups, individuals with chronic needs, businesses/Chamber of Commerce, health insurers/managed care organizations

University of Southern Maine

Documenting Community Input

- Document how the hospital took into account input from persons representing the broad interests of the community
- Document when/how these individuals/groups were consulted
 - Meetings, focus groups, interviews, survey, written correspondence, etc.
- Identify names, titles, and affiliations of individuals consulted
- For individuals with special knowledge/expertise in public health, briefly describe their expertise/knowledge
- For individuals representing vulnerable populations, briefly describe their leadership/representative role

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

University of Southern Maine

Other Reporting Requirements

- Prioritization of community health needs
 - Describe all community health needs identified by CHNA, their prioritization, and the process/criteria used in prioritizing such needs
- Resource inventory
 - Describe existing health care facilities and resources within the community available to meet community health needs identified through CHNA
- One assessment must be conducted every 3 years and considered conducted in the taxable year that the written report is made widely available to the public.

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

University of North Carolina at Chapel Hill
University of Southern Maine

Dissemination of CHNA Results

- Must be made widely available to the public and remain available until a subsequent CHNA is made widely available
- Must be posted on hospital's/organization's website or, for those without a website, on another entity's website as long as either:
 - A link is provided with instructions for accessing the report; or
 - A direct access website address/URL is provided to anyone requesting it
- Considered “widely available” if:
 - Website provided clear instructions for downloading the report;
 - Document available must be an exact version;
 - Access is free and does not require special hardware/software; and
 - Direct access website address/URL is provided to anyone requesting it

Coordinate CHNA Efforts

- Federal grantees, state/local public health departments, FQHCs, etc have needs/mandates to conduct CHNAs
 - National voluntary accreditation program for PH departments requires a CHNA and a community health improvement plan
 - MAPP process for local health departments
- Coordinate efforts to maximize information and minimize cost
- Requires a broader focus; may be more time consuming and labor intensive; collaboration can be messy
- Benefits: greater involvement and acceptance by community, participants can share costs

After the CHNA: Next Steps

- **Develop an implementation strategy**
 - Use evidence based strategies to address priorities (Sources: CDC, Catholic Health Association, Public Health Institute)
 - Critically evaluate existing “legacy” activities
 - Focus on charity/discounted care policies to expand access
 - Analyze bad debt activity to understand access issues
 - An inclusive process to prioritize community needs can support/defend decisions on which needs hospital will or will not address
- **Develop ways to measure and communicate progress**
 - Develop performance indicators tied to community priorities
 - Share information with community – A crucial step in building trust

University of Southern Maine

Implementation Strategy

- Hospital is expected to develop a written implementation strategy describing how it plans to meet each of the health needs identified through the CHNA
- A copy of the most recently adopted implementation strategy must be attached to the annual Form 990
- For multi-hospital organizations, each hospital must meet this requirement separately
- Plan must identify needs that the hospital does not intend to meet and explain why
- An valid and inclusive priority setting process can support the hospital's decisions regarding the needs it will address

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

Flex
Monitoring
Team

University of Minnesota
University of North Carolina at Chapel Hill
University of Southern Maine

Implementation Strategy Requirements

- Describe how the hospital plans to meet each health need that it intends to address
 - Identify programs and resources used to meet the health need
 - Describe anticipated impact of the commitment of programs/resources
 - Describe any planned collaboration with other organizations (related organizations, other hospitals, nonprofit organizations, state and local agencies, etc.) – All organizations must be specifically identified
- Each hospital must adopt its implementation strategy by the last day of the first tax year beginning after March 23, 2012
 - Must be adopted in same tax year as the CHNA was conducted
 - Considered “adopted” when approved by hospital’s governing body

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

Monitoring
Team

University of Minnesota
University of North Carolina at Chapel Hill
University of Southern Maine

Recommendations

- Focus implementation plan on priority needs identified through CHNAs
- Review IRS and Catholic Health Association community benefit reporting guidelines
- Align strategies with key community benefit activities
- Ensure that the two reports are in sync
- Form 990 includes community benefit activities not likely to appear in a CHNA
- Capture and report full range of allowable community benefit activities

Linking CHNA and Form 990: Implementation Strategy

- IRS guidance doesn't explicitly link CHNAs to Form 990 community benefit reporting requirement
- How does it all fit together?
 - **CHNA** – Posted on hospital website/internet and made widely available
 - **Implementation Strategy** – Submitted each year as part of each hospital's Form 990 filing
 - **IRS Form 990, Schedule H** – Hospital community benefit activity reported on Schedule H
- How might the IRS use this information?
 - Compare community benefits reported in Schedule H to the needs identified in CHNA and those addressed in the implementation strategy

A Performance Monitoring Resource for
Critical Access Hospitals, States, and Communities

Form 990 Questions on CHNA

- What does the CHNA describe? (check all that apply)
 - Definition of the community served by hospital
 - Demographics of community
 - Existing community facilities/resources available to respond to needs
 - How data was obtained
 - Health needs of community
 - Primary/chronic disease needs and health issues of uninsured persons, low-income persons, and minority groups
 - Process for identifying and prioritizing health needs and services needed
 - Process for consulting with persons representing community's interests
 - Information gaps limiting hospital's ability to assess all of community's health needs

Form 990 Questions on CHNA

- Did the hospital solicit input from persons who represent the community served by it? If yes:
 - Describe the process used
 - Identify persons consulted
- How did the hospital make its CHNA available to public?
 - Hospital website
 - Upon request from hospital
 - Other (describe)

Form 990 Questions on CHNA

- If hospital addressed needs identified in CHNA, indicate how:
 - Adoption of implementation strategy to address community needs
 - Execution of implementation strategy
 - Participation in development of community-wide community benefit plan
 - Participation in execution of community-wide community benefit plan
 - Inclusion of community benefit section in operational plans
 - Adoption of budget for provisions of services identified in CHNA
 - Prioritization of health needs in community
 - Prioritization of services identified in CHNA that hospital will undertake
- Did hospital address all needs identified in CHNA?
 - If no, explain which needs were not met and why

Form 990 Questions on CHNA

- If hospital addressed needs identified in CHNA, indicate how:
 - Adoption of implementation strategy to address community needs
 - Execution of implementation strategy
 - Participation in development of community-wide community benefit plan
 - Participation in execution of community-wide community benefit plan
 - Inclusion of community benefit section in operational plans
 - Adoption of budget for provisions of services identified in CHNA
 - Prioritization of health needs in community
 - Prioritization of services identified in CHNA that hospital will undertake
- Did hospital address all needs identified in CHNA?
 - If no, explain which needs were not met and why

University of Southern Maine

Focus on Addressing Unmet Community Needs

- For purposes of the IRS, CHNA is an integral part of a tax-exempt hospital's community benefit obligations
- Coming “full circle” to reconnect hospitals to their communities and **re-emphasize** their charitable mission
- Goal: move focus away from “random acts of kindness” to:
 - Community engagement
 - Collaboration between providers, public health, and other organizations
 - Accountability to identified local needs
 - Focus on accessibility of services and prevention
 - Focus on population health issues
